Issue #	ID	User story	Associated Tasks	Story points associated to a US	Priority (High, Medium, Low)	Risk	Responsible	Due date
2	US.01	As a student when accessing the website, the user wants to be welcomed with a login/registration page	<ul style="list-style-type: none"> - Create a login/registration page UI shown when the site is accessed - Add an email input field - Add a password input field - Add a Sign Up option on the page - Add a Login option on the page - Implement password verification on the password field 	4	High	HIGH - User can't use app if there is no option to sign up or login	Minh Giang / Gerom / Mark / Kevin	02/02/2026
7	US.02	As a user, I want my login information to be authenticated so that I can access the home page securely.	<ul style="list-style-type: none"> - Create a function to authenticate user credentials against those stored in the database - Allow access to the home page upon authentication - Create a function that welcomes the user into the home page - Add a Logout button - Redirect the user to the login page on logout 	8	High	HIGH - authentication is the gateway into the app, have to ensure data privacy is maintained	Matthew / Mark / Gerom	06/02/2026
N/A	US.03	As a user, I want to access a dashboard so that I can navigate MealMajor easily	<ul style="list-style-type: none"> - Design basic dashboard layout - Add navigation links (Profile, Recipes, Planner) 	5	High	HIGH - user cannot have access to the website's functionalities without navigation links		
N/A	US.04	As a user I want to create a profile that suits me and be able to manage it (allergies, diets)	<ul style="list-style-type: none"> -Design a short quiz/ survey to collect user's information such as diet preferences, allergies, etc. -Profile saves in database 	6	High	HIGH - meal planner has a high reliance to this feature, and user must be informed of the safety implications of each recipe		
N/A	US.05	As a user, I want the ability to create recipes that will be available on demand, to edit their information once created, and to delete them if needed.	<ul style="list-style-type: none"> - Create a modal that will accept and save the recipe's information as its inputs once the "New Recipe" button is clicked - Create an edit modal to edit the recipe's information once the "Edit" button is clicked - Remove a recipe from the database as well as from the website once the "Delete" button is clicked 	9	High	HIGH - main functionality of the website relies on this feature being created		
N/A	US.06	As a user, I want to be able to specify the ingredients, preparation time, preparation steps and cost of the recipes I create.	<ul style="list-style-type: none"> - Add an input field to the modal for the ingredients - Add an input field to the modal for the preparation time - Add an input field to the modal for the preparation steps - Add an input field to the modal for the cost 	3	Medium	MEDIUM - the recipe objects will be available, but their respective details remain an important part		
N/A	US.07	As a user, I want the ability to view all the recipes I have made so far, and to see their respective information when I click on one of them.	<ul style="list-style-type: none"> - Design a UI page to view all current recipes - Create a recipe UI element that will display its name, preparation time, and picture - Create a "New Recipe" button - Create an "Edit" button for every recipe - Create a "Delete" button for every recipe 	7	Medium	MEDIUM - the recipe data will all be present, but this feature will ensure that it is accessible and well-presented to the users		
N/A	US.08	As a user, I want to be able to search and filter the recipes that I have created	<ul style="list-style-type: none"> - Add a search box that searches through all available recipes - Add the option to filter the search by time, difficulty, cost, dietary tag, etc. 	4	Low	LOW - searching and filtering don't affect the main functionality of the website		

N/A	US.09	As a user I want to create a weekly meal plan	-Add a function to create a weekly meal plan according to the user's profile and preferences - View meals in a grid format (create another UI) -Avoid duplicate meals in the same week	10	High	HIGH - it is a major use case of the website's functionality		
N/A	US.10	As a user I want the ability to edit or remove meals from the weekly planner	- Add a function to edit a meal - Add a function to delete a meal	5	Medium	MEDIUM - not a main functionality as the weekly planner still works fine		
N/A	US.11	As a user I want the ability to assign recipes to a day of the week and to meal type	-Add a function to assign a recipe to a certain day of the week -Add a function to assign a recipe to a certain meal type (breakfast/lunch/dinner/snack)	5	Low	LOW - this is an extra functionality that will enhance the user experience but that is by no mean essential		

Issue #	Story ID	Task	Responsible	Due date
3	US.01	Setup login/registration page UI that includes an input field for the email and password	Minh Giang / Gerom	02/02/2026
4	US.01	Implement password validation rules that check length, upper/lowercase and no underscores	Kevin / Gerom	02/02/2026
5	US.01	Add a login button that triggers user authentication function and displays errors for invalid credentials	Minh Giang / Gerom	02/02/2026
6	US.01	Add a register button that triggers user creation after validation passes and shows feedback for existing account & suboptimal password	Minh Giang / Gerom / Mark / Kevin	02/02/2026
8	US.02	Create function to authenticate a user by comparing credentials with stored values in database and returns error messages on failure.	Matthew / Gerom	06/02/2026
9	US.02	Implement route protection to prevent access to home page unless user is authenticated and to redirect unauthenticated users back to the login page.	Mark / Gerom	06/02/2026
